

# LIAM GERAGHTY

Bsc Quantity Surveying  
StI Group

## WHY DID YOU DO AN APPRENTICESHIP?

I joined STI Group in August 23 and decided to pursue an apprenticeship to gain practical learning and industry experience. I specifically chose STI Group for the dynamic nature of the work, and I believe an apprenticeship is a great way to immerse myself in the field.

## WHAT LEVEL APPRENTICESHIP ARE YOU STUDYING?

Currently, I'm studying BSc Quantity Surveying at UCEM University, and I anticipate completing my apprenticeship journey in the year 2028.

## HOW HAS STUDYING AN APPRENTICESHIP PREPARED YOU FOR THE WORLD OF WORK?

The apprenticeship has provided me with a better understanding of how to conduct myself in a working environment. It's not just about the technical knowledge but also about gaining practical skills and learning how to navigate the professional world effectively.

## DID YOU ENJOY YOUR APPRENTICESHIP?

Absolutely, I enjoy my apprenticeship a lot. One of the things I find most enjoyable is the variety of projects I get to work on for different clients. It keeps things interesting and allows me to continually learn and grow.

## HOW WAS THE PROCESS OF APPLYING/ STARTING AN APPRENTICESHIP?

After completing my A-levels at sixth form, I began researching apprenticeship opportunities. I found an opening at STI Group online, and the process from applying to starting was smooth. It's been a rewarding journey since.
